

Environmental Consultants

WHY WORK WITH US

CARLIN is delivering some of the most exciting projects across NI and ROI. We pride ourselves on innovation, quality and service. We believe in delivering value, which means we go over and above for our clients and create long lasting relationships. Every day you will be learning, developing and finding solutions. We are looking for people who share our ambitions and values.

WHO WE ARE LOOKING FOR

Environmental Consultants with a background in Environmental Impact Assessment and 5+ years of relevant industry experience in a consulting, private industry or a government environment, who are looking for a change and want the opportunity and freedom to lead on their own projects with a leading independent planning and environmental consultancy.

You will have extensive knowledge of environmental regulations in the UK and ROI. Membership of relevant professional institutions or working towards membership is required.

YOUR SKILLS

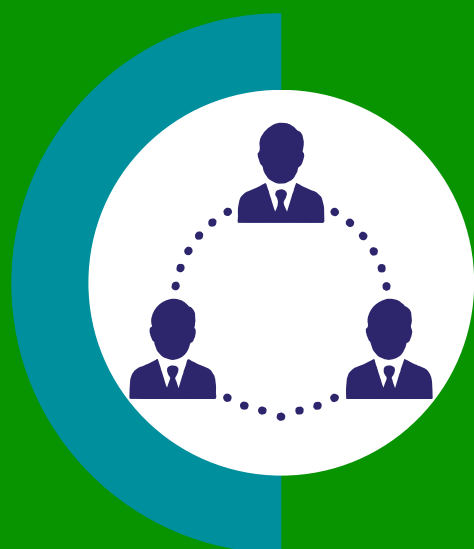

- Excellent written and verbal communication
- Excellent report writing
- Strong project management skills
- Ability to use your judgement and make decisions
- Ability to develop business relationships
- Excellent analytical skills
- Great attention to detail
- An interest in improving the places in which people live and work.

THE ROLE

Working within our small yet ambitious, passionate and driven team you will be vital in helping the expansion of our growing company.

You will work on a variety of projects and a range of environmental issues to provide expert advisory and assessment services to our private and public sector clients on environmental regulations, legislation and goals with the aim of minimising or eliminating environmental damage.
